

HCC Information Manager

HCC Information Manager utilizes the popular and widely used technologies from Business Objects™ for querying, reporting, and analyses. This application provides a feature-rich integrated toolset that can report on and analyze data from HCC Contract Manager, HCC Cost Accounting Manager and HCC Best Practice Manager, as well as to incorporate information from other data sources throughout the enterprise.

Business Insight Through Analyses

The typical reports used historically to monitor the operations of healthcare organizations often raise as many questions as they answer. With easy-to-use on-report analysis, **HCC Information Manager** turns a report into a valuable investigation tool. Calculations can be added to make sub-totals, show variances or averages, and data can be grouped or reorganized to show trends or highlight problems. Without having to swap tools, users can drill down into the detail underlying a summarized report or even drill through to other related reports. Save and distribute reports to all or specific users in a variety of formats.

Focused Solutions for Clear Results

- ◆ **Improve decision making with access to performance and profitability information**
- ◆ **Reduce time to complete and publish ad hoc analyses**
- ◆ **Empower management staff with current information**
- ◆ **Integrate information from multiple sources with browser-based “My InfoView” portal**
- ◆ **Easily drill down into data to understand the “why” of query results**

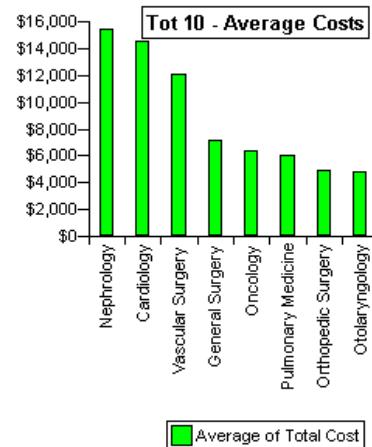

Use **HCC Information Manager** to:

- ✓ Transform data into strategic information using on-line analytical processing (OLAP)
- ✓ Perform multi-dimensional analyses on financial and clinical data found in your HCC database **and in other enterprise data sources**
- ✓ “Point and click” data mining and drill down to arrive at relevant levels of detail
- ✓ Expand upon pre-defined reports that can be transformed into presentation quality graphics
- ✓ Run queries and publish reports on pre-defined schedules
- ✓ Use your browser to create queries, reports and to reports created by others
- ✓ Exception-based, automatic report distribution based upon your pre-defined range of data values

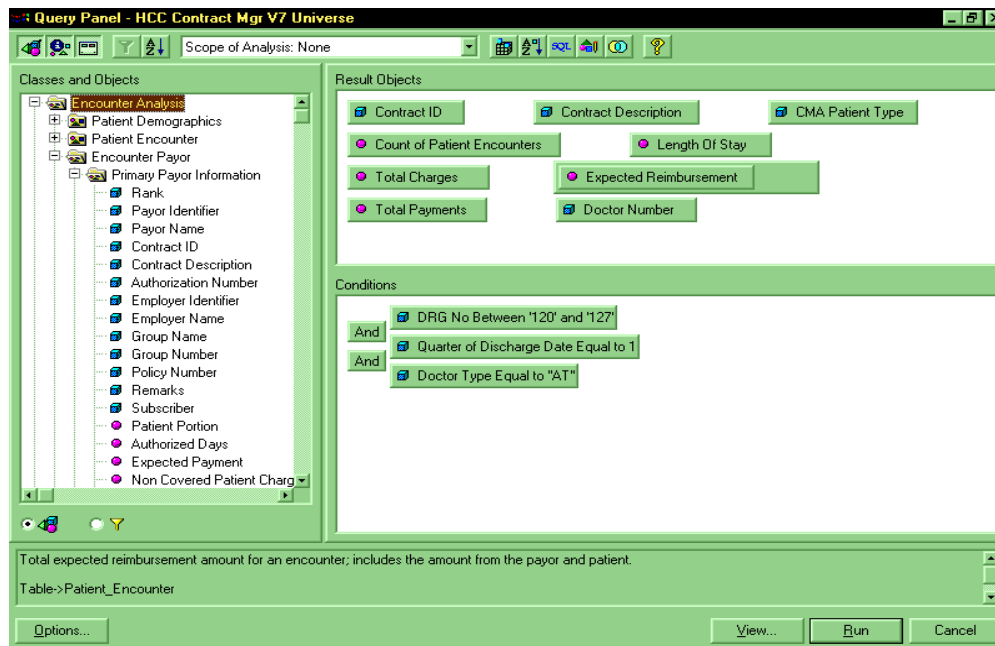

HCC Information Manager

Each document contains the source query, the actual “data cube” retrieved by the query, and one or more reports and/or graphs to present the data

Admitting Doctor Specialty	Number of Encounters	Average Total Cost	Avg LOS
Nephrology	5	\$15,520.25	10
Cardiology	22	\$14,533.01	5
